Coursework 3

For students enrolled on Principles and Applications of programming this coursework is worth 15% of your overall grade (30 credits). For students enrolled on Extended Java this coursework is worth 60% of your final grade (15 credits).

The coursework has 3 questions worth 20 marks each. The total marks available is 60. You should answer all the questions.

Submit your work as a zip file. The zip should contain 3 subfolders, one for each part of the assignment. Each subfolder should contain the source files and any design work. Don't include a src or out folder.

Please download the following files and read the guide carefully. You can also watch the overview [video here](#)

Feedback

Grade		
Part 1 Todo list CLI [20 marks] Maximum score 20	The program works fine, well done!	20 / 20
Part 2 MiniList collections [20 marks] Maximum score 20	Good work, even the very harsh tester gave you full marks! Well done!	20 / 20
Part 3 Todo List GUI and storage [20 marks] Maximum score 20	Very impressive functionality on your GUI and it looks just like the initial wireframe with simple txt file persistence. Very well done, one of the best GUIs i've seen for this coursework!	18 / 20

97 / 100
